

Greetings from Advance Mold & Manufacturing, Inc. ,

We are sending you this newsletter to announce points of interest in our growth, achievements and activities. We've initiated this communication as we strive to make your experience with us, one that benefits your teams and projects.

Advance Introduces Workcells for Customer Presses

In response to multiple customer requests we've reserved multiple empty machine bays for customer molding presses. We allow a customer the real-estate for a turn key cell that could include an injection press, new or existing mold, automation and packaging. This service is offered in our 12,000 sq.ft technical center, located across the street from Advance's mold manufacturing building.

This service allows:

- Better comparison for evaluating material choices for prototype and production parts.
- Bridge capacity support for molded product.
- Mold qualification per the customer's protocol.
- Quality initiatives such as Cpk, DOE and FAI readily available.

Browse through our website site and see for yourself. Let us know if there is anything else you would like to see covered.

That's all we have to share with you today, but our activities are ongoing – expect to see more exciting news in the coming months.

Thank you so much for reading. We appreciate the opportunity to help out.

Sincerely,

Douglas Schneider
President
Advance Mold & Manufacturing, Inc.

A full contract manufacturer of injection molds. Since 1959 we have been a leader in the plastics industry, continually utilizing the latest design and manufacturing technology. Our commitment to excellence begins with attention to every detail, from concept through mold qualification.
