

Greetings from Advance Mold & Manufacturing, Inc. ,

We are sending you this newsletter to announce points of interest in our growth, achievements and activities. We've continued this communication as we strive to make your experience with us, one that benefits your teams and projects.

Advance Expands Facility, Capabilities

At a time when many manufacturers were mired in the recession, Advance Mold was expanding, adding equipment and capabilities.

Completed in 2010, our 30,000 square foot building underwent an expansion totaling 60,000 square feet. Our manufacturing additions included more 5-axis machining, automated electrode manufacturing and EDM capabilities. The moldmaking facility is equipped to produce multi tool, high cavitation mold build programs. Thirty two, sixty four and ninety six cavity mold builds have become familiar sights on our floors.

Our second expansion was across the street from the main facility. This facility houses Advance's sample presses ranging from 28-Ton LSR, 110-Ton, 220-Ton two shot and 500-Ton. Empty machine bays are available for our customer's presses, automation and packaging so a true turn key work cell can be debugged before shipment to any global location.

Browse through our website site and see for yourself. Let us know if there is anything else you would like to see covered. Thank you so much for reading.
